Video Streaming Service for On-Campus Residents

SpectrumU

Oxford College of Emory University is proud to announce the introduction of SpectrumU for all on-campus residents. SpectrumU is a video streaming service that uses residents' Emory NETID to give them access to many live channels and On-Demand content including HBO and ESPN.

When connected to the Emory University wireless network, SpectrumU allows on-campus residents have access to our expanded channel lineup and stream On-Demand content. When not connected to the campus network you are still able to use the service, but some content will be unavailable.

The SpectrumU app is available for smartphone, tablets, computers and Roku devices. To download the SpectrumU app you can visit the Apple App Store, Google Play Store or Amazon App Store to download SpectrumU. To avoid finding the SpectrumTV app, which is a separate app, residents should search for "SpectrumU," not just "Spectrum". To access via Roku devices, select Spectrum TV from the Roku Channel Store.

Here is a list of currently supported devices. Apps for Apple TV and Xbox are expected in 2020.

• All major Android™ smartphones and tablets running Android™ 5 or above
• iPhone, iPad or iPod touch running iOS® 11 or above
• Kindle Fire Phone, all Kindle Fire models except for the first-generation model
• Mac: Safari 7 or newer, Firefox 45 or newer or Chrome 43 or newer
• PC: IE 11, Chrome 43 or newer, Firefox 45 or newer or MS Edge 12 or newer
• Roku: All second-generation players and TVs

To watch using your computer go to watch.spectrum.net, be sure to then click the "Sign into SpectrumU" button at the bottom of the page. On the next screen you will then enter emory.edu as the school domain. You will then log in using your Emory NETID.
